PRESENTS

Value Chain Development Opportunities

WEDNESDAY, JUNE 12TH 2019

This industry-oriented program, presented by CRIBE, is a new addition to the 2019 Joint International Forest Biorefining Conference and Symposium on Lignocellulosic Materials (ISLM). The day will focus on the business of biorefining, the products and markets it can inspire, and value chain development opportunities.

Hear from leading innovators, entrepreneurs and business developers who are shaping the Bio-Economy.

- Keynote speakers
- Panel discussions and workshops
- Networking and dialogue with industry leaders

Topics covered:

- Transforming research into commercial realities
- The latest product and industry innovations
- Market and value chain development
- The future socio-economic impact of the bio-economy
- Building business partnerships between Academia & Industry
- Creating bio-business clusters
